ABOUT ME

Mobile & Front End Developer with 2+ years of experience building enterprise applications for plantation, manufacturing, and operational environments. I help organizations digitize manual workflows through scalable mobile and web solutions, leveraging Flutter, React, TypeScript, Tailwind, Framer Motion, SQLite, NFC technology, and offline-first architectures.

EDUCATION

UNIVERSITAS PRIMA INDONESIA - 2022-2026

- Bachelor of Computer Science

WORK EXPERIENCE

PT Indoweb Host Kreasi - Flutter Developer

2025-NOW

- Laboratory System (Palm Oil Quality Control)**
 - Developed a Flutter-based laboratory management system to digitize palm oil quality control workflows.
 - Implemented real-time calculation engines for moisture, FFA, impurity, and other laboratory testing parameters.
 - Designed input-driven automatic calculations to eliminate manual processing steps.
 - Built offline-first architecture using SQLite to support operations in low-connectivity environments.
 - Implemented validation mechanisms that reduced reporting errors and improved data accuracy.
- Production & Stock Measurement System**
 - Led development of a production tracking and stock measurement application for factory operations.
 - Built automated stock aggregation and daily production monitoring features.
 - Implemented photo validation with token-based verification to reduce fraudulent reporting.
 - Developed synchronization mechanisms to reuse previous-day production data and streamline workflows.
 - Supported uninterrupted operations through offline-online synchronization architecture.
- Expedition & Logistics System (NFC-Based)**
 - Developed a logistics and expedition application using Flutter and NFC technology.
 - Implemented NFC card read/write functionality for offline data exchange between operational units.
 - Designed synchronization mechanisms to ensure data consistency after network recovery.
 - Integrated logistics workflows with laboratory, production, and weighing systems.
 - Improved operational reliability in remote plantation environments with limited connectivity.
- Unilever AI CCTV Project**
 - Contributed to the development of an AI-powered CCTV monitoring system for PPE compliance detection.
 - Assisted in testing and validating YOLO-based computer vision models.
 - Supported analysis of safety violation detection results and database integration.
 - Collaborated with AI engineers during model evaluation and deployment activities.
 - Gained practical experience in worker identification and duplicate detection prevention techniques.
- Time Sheet & Workforce Management System**
 - Developed a digital timesheet application integrated with facial recognition attendance systems.
 - Implemented automated working-hour calculations to support payroll processing.
 - Designed structured job reporting workflows for workforce activity tracking.
 - Built validation mechanisms to ensure attendance and work record consistency.
 - Improved payroll data accuracy through automated attendance verification.

WORK EXPERIENCE

PT Autostar Mandiri Teknotama – IT Support

2024–2025

- Process and clean purchase invoice data into structured and accurate formats
- Maintain and support legacy systems built with FoxPro
- Troubleshoot and resolve software and system issues
- Ensure system performance, stability, and reliability
- Assist in maintaining accurate data entry and data integrity
